

## > /Hello!

I am eager to compete for a position at your company! **With 23 years of progressive experience in the software development lifecycle, database design and administration, software architecture, agile team management and project management, I bring a genuine desire to become a critical component of your organization.**

**I am passionate about developing software.** While I have extensive experience in certain domains, I pride myself on my ability to adapt to changing requirements and platforms. **I will become an expert in any domain required and will produce quality results.**

My day-to-day activities have included: consultation with stakeholders; managing existing internal and external relationships; architecting, developing and delegating solutions; managing projects; creating cost estimates and budgets; providing technical support and assistance; demonstrating and explaining complex computer systems to non-technical teams; training; writing software code across the full web stack; building and managing relational databases; and managing flat datasets for the purpose of analyzing data.

**I personally enjoy challenging projects that require me to delve into all facets of my work experience while fostering a strong team atmosphere.** Nothing gives me a greater sense of purpose in the workplace than building an inclusive team of smart and capable individuals that wish to pursue their own career goals alongside the team.

I look forward to hearing from you!

Sincerely,  
Ryan Covert
